2 to 10 November · 2024

IMPARTS: SVAGITO LIEBERMEISTER

Date: 2 to 10 November · 2024

**Intensive & residential Training
in Alcanar Platja, Tarragona Spain.**

Beyond family constellation

THIS TRAINING CONSISTS OF 2 LEVELS

The 1st level is always at the beginning of November and the 2nd level is beginning of June of the following year

So that people can integrate what they have learned, the 3rd level “Family Constellations and Trauma” is optional and is offered every 2 years.

Next level 3-Oct 24 to Nov 1-2024

This is a highly sought after course, places are limited. People from different countries come.

It's a deep personal experience. While conveying all the theoretical and practical principles of systemic therapy. Apart from learning, it's a week of important personal work, healing. With a week of 2 active meditations per day. In addition to revealing painting exercises.

This Training is a deep personal experience on one hand, while transmitting all the theoretical and practical principles of systemic therapy on the other.

In this newly designed training, we will go beyond ordinary Family Constellation therapy, developing the understanding that our family members are not only the people with whom we are closely linked, but also represent our own inner energy. During this course, we will make the change from the outside to the inside, from being focused on others and returning to ourselves. We are the World.

We explore the energy fields into which a child is born and how the layers of the child mind are formed. A therapist needs to learn to tune into these energy fields and in this way understand the behaviour and feelings of a client. A constellation is simply a method of making such energy fields visible and we help to understand them. We will learn about the parent-child relationship (family of origin) and the male-female relationship (current family) and then we will understand that the other party is really an internal part of us.

Each participant will have the opportunity to experience the unconscious layers of their mind and in this way understand family and social conditioning, not only by seeing their own constellation, but also by observing and helping others. The therapist will explain step by step what a constellation reveals, how to stay connected to an energy field and find the source of love.

As our consciousness grows, our love and gratitude deepen.

Some of the topics treated:

- Love and order in a family system.
- Understanding the union
- Resolving guilt and shame.
- What supports love in the father-son and man-woman relationship.
- The function of conscience.
- The balance between giving and taking.
- The difference between blind love and conscious love.
- The interrupted movement to the mother.
- The dynamics between victim and perpetrator.
- Life, death and the unknown.

Constellations in Osho's style of are based on meditation.

It is rooted in a deep acceptance of life as it is, more than in any effort to improve. When we can honor what is, therapy ends, and meditation begins. We also learn by observing and being representatives of the constellations of other participants.

Who can attend?

Anyone who wants to bring the experience of this training to their personal and work life in a loving and healing environment.

Health, education and human rights professionals such as therapists, doctors, psychiatrists, psychologists, social workers and all people who wish to deepen their self-knowledge and achieve greater personal evolution..
